Downloading the IBM SPSS Modeler fix pack will cause the product to. In the current world of constantly changing applications, user interfaces are a crucial part of the infrastructure. The UI is always a target for optimization, as the user experience depends on it. We also believe that the future of personal assistants is dependent on UI. The team at DeepMind has made some very interesting progress in this regard. Today DeepMind is announcing new features of their personal assistant, DQN (Deep Q Network), an AI capable of learning human skills that people use in everyday life. DQN was already able to beat professional players of the game Atari games and was also able to teach itself how to play Super Smash Bros. It has now advanced to the point where it can play golf in a way that can fool a human player. In the video below, DQN is shown playing

a game of golf using the Unity game engine. It teaches itself through trial and error, over hundreds of thousands
